FROM: Frank Filas, Reclamation Engineer 

RE: DOE/039/006, Georgia Pacific's Mayfield Quarry

I spoke with Dave Corkill on March 29, 1988 concerning this quarry. Georgia Pacific has committed previously to having this site reclaimed by the end of the first quarter, 1988. Dave said that Georgia Pacific has not been able to reclaim the site as of yet, because the quarry is still producing a small amount of high grade gypsum.

I told Dave that he should send a written request to Lowell Braxton requesting an extension on reclamation until the fourth quarter, 1988. I recommend that this extension be approved for the following two reasons:

1. Fall is the preferred time to reclaim.
2. Georgia Pacific has done an excellent job in reclaiming pits in the Sigurd area during 1987. There is no reason to believe that the same type of work cannot be done at Mayfield.
